

### Things you already know:

- Be familiar with webpages and the types of content they hold and that you can click links to navigate a website.
- Have some basic knowledge of how to be safe online.

### Knowledge you will gain:

- To know the common elements that make up a website including global navigation, submenus, and content (text, images, embedded video etc.)
- Know how to do effect web searches using key words.
- To understand what to do if they come across online content that worries them or is inappropriate. They will also know about what personal information is and the risks of posting this openly on the internet.
- To know what embedded media is and understand that embedded media is still under control from the original website, so if a video etc. is removed from their site, it will also disappear from your site.
- Know how to construct menus and combine a range of media on their webpage including text images and embedded content.
- Develop understanding of how to stay safe online, by creating 2-3 webpages on this subject.

### Specific skills/understanding

Experience of using a web based Content Management System will be gained this half term. It will give an understanding of having a public facing site and a 'backend' where changes can be made and processed in readiness to be made live.

Computing Knowledge Organiser Year 5

Spring Term 1

# We are Web Developers

### Vocabulary

**global menu/navigation:** Typically the top menu bar that will appear on all pages within a website.

**website:** A collection of webpages that exist within a single website address (or domain).

**submenu:** A secondary menu that often drops down from the global menu.

**embed:** using an embed code or address to insert content from another website into your website.

**formatting:** Changing colours, styles, fonts, sizes in order to change the look and feel of your website..

**keywords:** the important words that will find your information, not common words that would appear in most searches e.g. common unnecessary words like: the, is, a etc.

### Ongoing skill set

Saving images from the internet and uploading images.

Typing usernames and passwords with care.
